Deep hydration and calming support

Centella Asiatica

Sensitive-skin and soothing support

Bakuchi

Retinol alternative and skin-tone support

Pomegranate

Anti-aging and skin-renewal support

Rosemary

Antioxidant, scalp and hair applications

Supercritical CO₂ Extracts

Controlled carbon-dioxide extraction preserves delicate aromatic and bioactive compounds without residual process solvents.

No residual solvents

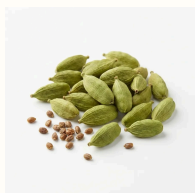

CO₂ leaves no process-solvent residue, supporting food and wellness applications.

Lower-temperature extraction

Milder conditions help preserve heat-sensitive botanical compounds.

Resource-conscious process

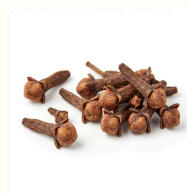

A recyclable, non-toxic extraction medium designed for controlled performance.

CARDAMOM

COFFEE

CLOVE

GINGER

SEA BUCKTHORN

BLACK CUMIN

ABOUT SATTVA BOTANICALS

Nature, distilled to its highest standard.

We are a science-driven natural extraction company using considered sourcing and controlled processes to deliver consistent botanical ingredients for food, beverage, cosmetics, health and wellness partners.

Traceable sourcing

Ingredient identity begins with documented origin and supplier control.

Batch-led quality

Testing, documentation and specifications support every commercial conversation.

Formulation partnership

Our team helps identify the right format, potency and application fit.

Start a conversation.
